

## ABOUT THE RHODE ISLAND STATEWIDE PLANNING PROGRAM....

The Rhode Island Statewide Planning Program is established by Chapter 42-11 of the *General Laws* as the central planning agency for state government. The work of the Program is guided by the State Planning Council, comprised of state, local, and public representatives and federal advisors. The staff component of the Program is comprised of the Statewide Planning unit of the Office of Library and Information Services within the Department of Administration.

The objectives of the Program are to plan for the physical, economic, and social development of the state; to coordinate the activities of government agencies and private individuals and groups within this framework of plans and programs; and to provide planning assistance to the Governor, the General Assembly, and the agencies of state government. The Program prepares and maintains the State Guide Plan as the principal means of accomplishing these objectives. The State Guide Plan is comprised of a series of functional elements that deal with physical development and environmental concerns, the economy, and human services.

Program activities are supported by state appropriations and federal grants. Funding for production of this urban and community forest resources plan was provided principally by a grant from the U.S. Forest Service provided through the R.I. Department of Environmental Management and the R.I. Tree Council. State of Rhode Island general appropriations to the Statewide Planning Program provided additional support. The contents of the plan reflect the views of the Statewide Planning Program, which is responsible for the accuracy of the facts and data presented herein. The contents do not necessarily reflect the views and policies of the U.S. Forest Service, nor does the mention of trade names or commercial products constitute endorsement or recommendation for use.
